## Foreword

Development of a sound information system is critical for successful monitoring and implementation of any programme, particularly in social sectors. Thus, when *Sarva Shiksha Abhiyan* (SSA) was launched in 2001, not only was the coverage of District Information System for Education (DISE) extended from DPEP districts to all districts of the country but its scope was also expanded from Primary to entire Elementary level of education.

I am glad that all the States and Union Territories of the country have adopted DISE and EMIS Units have been established both at the state and district levels across the country. By and large, District Elementary Education Plans across the country are based on DISE data. I am confident that DISE will play a pivotal role in monitoring the Right of Children to Free and Compulsory Education Act, 2009 as most of the information required is available through DISE in a '*ready to use*' form at all levels, from school up to the national level.

Two publications, *District and State Elementary Education Report Cards* and *Elementary Education in Rural and Urban India* were recently brought out by NUEPA. In continuation of its efforts towards effective dissemination of educational information, I am happy to note that NUEPA is now bringing out *Flash Statistics: Elementary Education in India: Progress towards UEE* which is based on DISE data for the year 2008-09. I am confident that the State-specific indicators on different aspects of Universalisation of Elementary Education (UEE) presented in the volume will be of immense use to researchers and development planners interested in the Indian education system.

I would like to place on record my deep appreciation for the commitment and dedication of the entire DISE Team led by Dr. Arun C. Mehta, Professor and Head, Department of Educational Management Information System, NUEPA towards bringing out the present publication.

(Anshu Vaish)

**Prof. R. Govinda**  
Vice-Chancellor

### From the Vice-Chancellor's Desk

It pleases me to present the *Flash Statistics: Elementary Education in India: Progress towards UEE* which is based upon the DISE 2008-09 data. Besides launching one million plus School Report Cards, we have recently brought out significant publications namely *Elementary Education in India: Where Do We Stand: District Report Cards, State Report Cards, Analytical Report and Analytical Tables for the year 2007-08* which contain a large number of indicators encompassing different aspects of universalisation of elementary education. The state-specific indicators that are being disseminated through the present publication are very rich in contents. In addition, we are also going to release shortly the District and State Report Cards as well as Analytical Report for the year 2008-09.

NUEPA is committed to providing professional and technical support to all the States and UTs. This has helped in improving the capacities of both state and district level MIS officers. We would further intensify our capacity building activities in the years to come.

I thank the DISE team led by Prof. Arun C. Mehta for bringing out this publication. I hope that researchers, policy makers, administrators and planners will find the publication both informative and useful.

New Delhi  
January, 2010

  
(R Govinda)

## Acknowledgements

For the last several years, NUEPA has been actively involved in strengthening the Educational Management Information System (EMIS) in the country. The *Flash Statistics: Elementary Education in India: Progress towards UEE* is based on the data received from all the States & UTs of the country for the year 2008-09. Besides an Educational Development Index, the publication presents not only state-specific indicators but also brings in many new dimensions of elementary education into focus. It incorporates key indicators on all aspects of universalisation of elementary education in case of all the States & UTs of the country.

The *Flash Statistics: 2008-09* is based on the data received from as many as 1.29 million schools spread over 633 districts across 35 States & UTs. The study of this magnitude cannot be completed without the active involvement and participation of the EMIS professionals at the national and sub-national levels. I am extremely thankful to all the State Project Directors, the state level EMIS coordinators and district level programmers and data entry operators for timely supply of data.

I take this opportunity to thank UNICEF, Delhi, in particular Ms Urmila Sarkar, Chief (Education) for consistently supporting EMIS activities ever since the inception of DISE and Ms Anita Kaul, Joint Secretary and Ms Neelam S Rao, Director, Department of School Education & Literacy, Government of India, who played a crucial role in facilitating the implementation of DISE in various states. I am thankful to Dr. Deepa Sankar, World Bank, Delhi office for useful suggestions which has helped us in improving EDI each year.

I am thankful to Prof R Govinda, Vice-Chancellor, NUEPA, for his consistent encouragement and guidance. I take this opportunity and thank NUEPA faculty for their support.

The contribution of Shri Naveen Bhatia, Computer Programmer, NUEPA and Shri Shalender Sharma, Chief Consultant, Technical Support Group, Ed. CIL, in database management, is gratefully acknowledged. I am thankful to Ms Alka Mishra, Project Associate Fellow (DISE Project) for computing Educational Development Index.

I am also thankful to colleagues in the Publication Unit especially Shri Pramod Rawat, Deputy Publication Officer and Ms Sheeba Biju, Project Publication Officer for timely bringing out the publication. I also thank Ms Shakun Sethi and Ms Aseela M of the DISE Project for their able assistance.

I hope that this publication will be of value to education planners, policy formulators and researchers. Suggestions for improvement are most welcome.

**Arun C. Mehta**

## **Disclaimer**

*Raw data presented in the document or used for calculating indicators are essentially based on data provided by the States and UTs through annual data collection (as on 30<sup>th</sup> September 2008) under SSA (DISE). NUEPA is committed to provide professional and software support to all States and UTs as well as for dissemination and analysis of data as it is provided by the individual States and UTs.*

*In no way, NUEPA is involved in data collection as such and therefore the accuracy and truthfulness of the data rest with the States/UTs. The State Project Directors have certified that data is free from errors and inconsistencies and hence may be merged into the national database maintained at NUEPA, New Delhi.*

\* Total may not add to 100 because of missing values and rounding of figures.

\*\* State did not specify reasons of decline in number of teachers.

# Teachers teaching Grade VIII in Secondary Schools has also been considered.

\*\*\* Increase may also be attributed to recruitment of a few LJ teachers as regular teachers.

**EDUCATIONAL  
DEVELOPMENT  
INDEX  
(EDI)  
2008-09**

### Variables used in Computing Educational Development Index (EDI)

<b>Component</b>	<b>Indicator</b>
<b>ACCESS</b>	Percentage of Habitations not Served* (corrected with reference to new schools (Government) opened since 2002-03)
	Availability of Schools per 1000 Child Population
	Ratio of Primary to Upper Primary Schools/Sections (only at Upper Primary stage)
<b>INFRASTRUCTURE</b>	Schools with Student-Classroom Ratio > 40
	Schools with Drinking Water facility
	Schools with Common toilet
	Schools with Girl's toilet
<b>TEACHERS</b>	Percentage of Schools with Female Teachers (in schools with 2 and more teachers)
	Schools with Pupil-Teacher Ratio > 40
	Percentage of schools with less than 2 teachers (in schools with more than 15 students) (Primary schools only)
	Percentage of Schools with < 3 teachers (Upper Primary schools/sections)
	Teachers without Professional Qualification
<b>OUTCOMES</b>	Gross Enrolment Ratio - Overall
	Participation of Scheduled Castes Children: Percentage SC Population (2001 Census) - Percentage SC Enrolment
	Participation of Scheduled Tribes Children : Percentage ST Population (2001 Census) - Percentage ST Enrolment
	Gender Parity Index in Enrolment
	Repetition Rate
	Drop-out Rate*
	Ratio of Exit Class over Class I Enrolment (only at Primary stage)
	Transition Rate from Primary to Upper Primary level (only for Upper Primary level)
	Percentage of Appeared Children securing 60 per cent and more marks

**Note:**

- Indicators used for constructing EDI were pre-determined by the MHRD, Government of India. Contributions received from the members of the Multi-Disciplinary Expert and Core Group on EDI constituted by the MHRD in 2005-06 is gratefully acknowledged.
- Indicators were normalized before the Principal Component Analysis was applied to decide the factor loadings and weights.
- Separate dimensional indices were constructed first before finalising the EDI; and

\* Number of access-less habitations has been obtained from the Seventh All India Educational Survey and drop-out rate at Upper Primary level from the Selected Educational Statistics (MHRD). Wherever necessary projected child population provided by the Office of the Registrar General of India has been used.

## Assumptions used in Computing EDI

An effort has been made by the National University of Educational Planning and Administration (NUEPA) and the Government of India (MHRD, Department of School Education and Literacy) to compute an Educational Development Index (EDI), separately for Primary and Upper Primary levels of education and also a composite index for the entire Elementary education which is exclusively based on the DISE data for the year 2008-09. The first such attempt was made in 2005-06.

A set of 21 indicators have been used in computing EDI which are re-grouped into the four sub-groups, namely Access, Infrastructure, Teachers and Outcome indicators. The Indicators used for constructing EDI were pre-determined by a Working Group on EDI constituted by the MHRD during 2005-06 of which NUEPA was also one of the institutional members. In the present year, improved versions of a few variables were used. Percentage of access-less habitation was one such variable which is latest available for the year 2002-03. In view of a large number of schools that have been opened across the country in the recent past, the same was corrected with reference to new schools (Government) opened since 2002-03. Like in the previous year, in place of Gross Enrolment Ratio of SC/ST population, percentage of SC/ST population (to total population, 2001 Census) minus percentage of SC/ST share of enrolment in Primary and Upper Primary classes has been used to assess participation of the SC/ST children. In 2008-09, Schools with Student-Classroom Ratio (SCR) above 40 and schools with Pupil-Teacher Ratio (PTR) above 40 have been used in place of schools having SCR and PTR above 60. Similarly, in place of single-teacher schools, percentage of Primary only schools with less than 2 teachers (in schools with more than 15 students) has been used in computing Teacher's Index at Primary level. In view of these changes, average SCR and PTR and percentage of passed children to total enrolment have not been used in computing EDI in 2008-09 both in case of Primary and Upper Primary levels of education.

After data was cleaned, each indicator was *normalised* by using the following formula:

$$NV_{ij} = 1 - \left[ \frac{\{ \text{Best } X_i - \text{Observed } X_{ij} \}}{\{ \text{Best } X_i - \text{Worst } X_i \}} \right]$$

Upon receiving *normalised values*, *Principal Component Analysis* (PCA) was applied to decide the factor loading and weights. In case of a few variables, policy options were explored to identify the *best values* instead of based on the *observed values*. Some of these variables are: access-less habitations (best value, zero), percentage of schools with pupil-teacher and students-classroom ratio above 40 (best value, zero), percentage of teachers without professional qualification (best value, zero) etc. Because of these changes, EDI in 2008-09 may not necessarily be comparable with the same in the previous year.

*“It must be conceded that the DISE does represent a significant advancement over the earlier systems of data collection, compilation, analysis and publications. In terms of reduction of time-lag and improvement of quality, it represents a phenomenal stride over all the other systems?”*

*“DISE can be said to have emerged as a time-tested ‘model’ to serve educational statistics. It must become the only system and shall be upgraded to cover Secondary and Senior Secondary stages also.”*

Report of the Review Committee on Educational Statistics  
Ministry of Human Resource Development  
Government of India  
*December, 2008*

*“The Mission would like to congratulate NUEPA & MHRD on the outstanding work that has gone into creating the country-wide District Information System for Education.”*

10<sup>th</sup> Joint Review Mission of SSA  
Government of India  
*July 20 to 31, 2009*

# **One Million+ School Report Cards**

([www.schoolreportcards.in](http://www.schoolreportcards.in))

The National University of Educational Planning and Administration has created a comprehensive database on elementary education in India under one of its most prestigious projects, known as, District Information System for Education (DISE). The project covers both Primary and Upper Primary schools/sections of all the districts of the country. What is more remarkable about DISE is that it has completely eliminated the time-lag in availability of educational statistics which has come down drastically from 7-8 years to less than a year at the national and only a few months at the district and state levels. DISE is supported by the Ministry of Human Resource Development and UNICEF.

The National University has successfully developed School Report Cards of more than 1.29 million Primary and Upper Primary schools/ sections. In addition to quantitative information, the Report Cards also provide qualitative information and a descriptive report about individual schools. And, all that can now be accessed with the Click of a Mouse. Even school-specific raw data has also been provided online to users.

The Report Cards are produced to provide users comprehensive information on all the vital parameters, be it student, teacher or school related variables, yet concise, accurate information about each school in a standard format which is easy to understand and allows meaningful comparisons to be made among schools. We hope that these reports are used in constructive conversations which lead to improved education for all children across the Country.
