Development of a sound information system is critical for successful monitoring and implementation of any programme, particularly in social sectors. Design of a school information system was, therefore, accorded priority from the very beginning of the District Primary Education Programme (DPEP) in 1994, as a result of which the District Information System for Education (DISE) was developed by the National University of Educational Planning and Administration (NUEPA), New Delhi.

Importance of an Educational Management Information System (EMIS) was reiterated when *Sarva Shiksha Abhiyan* (SSA) was launched in 2001. SSA guidelines envisage development of a community-owned and transparent EMIS, and preparatory activities of the programme included substantial strengthening of MIS infrastructure in all the States and UTs of the country.

I am happy to note that NUEPA is bringing out *Flash Statistics: Elementary Education in India: Progress towards UEE* which is based on DISE data for the year 2007-08. I am confident that the state-specific indicators presented on different aspects of UEE in the volume will be used in planning for good quality elementary education, and that data users, researchers and development planners interested in the Indian education system will find the volume useful.

Based on the DISE data, an attempt has also been made to develop an Educational Development Index (EDI) which may be helpful in deciding future course of investment on elementary education in the country. I am confident that States will compute district-specific EDI as the same will help them in identifying districts that need immediate attention of planners and policy makers.

I take this opportunity to thank UNICEF, Delhi for consistently supporting EMIS activities since 1994, as well as NUEPA, especially Dr. Arun C. Mehta, Professor & Head, Department of Educational Management Information System and his entire team, for bringing out the present publication.

(Arun Kumar Rath)

### From the Vice-Chancellor's Desk

It pleases me to present the *Flash Statistics: Elementary Education in India: Progress towards UEE* which is based upon the DISE 2007-08 data. Besides launching one million plus School Report Cards, we have recently brought out significant publications namely *Elementary Education in India: Where Do We Stand: District Report Cards, State Report Cards, Analytical Report and Analytical Tables for the year 2006-07* which contain a large number of indicators encompassing different aspects of universalisation of elementary education. The state-specific indicators that are being disseminated through the present publication are very rich in contents. In addition, we are also going to release shortly the District and State Report Cards as well as Analytical Report for the year 2007-08.

NUEPA is committed to provide professional and technical support to all the States and UTs. This has helped in improving the capacities of both state and district level MIS officers. Further, we wish to intensify our capacity building activities in the years to come.

I thank the DISE team led by Prof. Arun C. Mehta for bringing out this publication. I hope that the researchers, policy makers, administrators and planners will find the publication both informative and useful.

New Delhi  
January 2009

  
**(Ved Prakash)**

## Acknowledgements

For the last several years, NUEPA has been actively involved in strengthening the Educational Management Information System (EMIS) in the country. The *Flash Statistics: Elementary Education in India: Progress towards UEE* is based on the data received from all the States & UTs of the country for the year 2007-08. Besides an Educational Development Index, the publication presents not only state-specific indicators but also brings in many new dimensions of elementary education into focus. It incorporates key indicators on all aspects of universalisation of elementary education in case of all the States & UTs of the country.

The *Flash Statistics: 2007-08* is based on the data received from as many as 1.25 million schools spread over 624 districts across 35 States & UTs. The study of this magnitude cannot be completed without the active involvement and participation of the EMIS professionals at the national and sub-national levels. I am extremely thankful to all the State Project Directors, the state level EMIS coordinators and district level programmers and data entry operators for timely supply of data.

I take this opportunity to thank UNICEF, Delhi, in particular Mr. Samphe Lhalungpa, Chief (Education) for consistently supporting EMIS activities ever since the inception of DISE and Ms Vrinda Sarup, Joint Secretary and Ms Neelam S Rao, Director, Department of School Education & Literacy, Government of India, who played a crucial role in facilitating the implementation of DISE in various states.

I am thankful to Prof Ved Prakash, Vice-Chancellor, NUEPA, for his consistent encouragement and guidance. I take this opportunity and thank NUEPA faculty for their support.

The contribution of Shri Naveen Bhatia, Computer Programmer, NUEPA and Shri Shalender Sharma, Chief Consultant, Technical Support Group, Ed. CIL, in database management, is gratefully acknowledged. I am thankful to Ms Alka Mishra, Project Associate Fellow (DISE Project) for computing Educational Development Index. Contributions received from the members of the Multi-Disciplinary Expert & Core Group on EDI Constituted by the MHRD in 2005-06 is gratefully acknowledged.

I am also thankful to colleagues in the Publication Unit especially Shri Pramod Rawat, Deputy Publication Officer and Ms Sheeja Biju, Project Publication Officer for timely bringing out the publication. I also thank Ms Shakun Sethi and Ms Aseela M of the DISE Project for their able assistance.

I hope that this publication will be of value to education planners, policy formulators and researchers. Suggestions for improvement are most welcome.

<sup>#</sup> Computed (as per school structure) based upon the available district-wise enrolment data over four/five years. Hence, may not represent the entire state. Retention rate at primary level is based upon enrolment data of 539 districts. At the national level, the same is calculated for Grades I to V.

<sup>@</sup> Computed based upon the population projections provided by the Office of the Registrar General of India.

NA : Not Available.

**EDUCATIONAL  
DEVELOPMENT  
INDEX  
(EDI)  
2007-08**

### Variables used in Computing Educational Development Index (EDI)

Component	Indicator
ACCESS	Percentage of Habitations not Served* (corrected with reference to new schools (Government) opened since 2002-03)
	Availability of Schools per 1000 Child Population
	Ratio of Primary to Upper Primary Schools/Sections (only at Upper Primary stage)
INFRASTRUCTURE	Average Student-Classroom Ratio
	Schools with Student Classroom Ratio $\geq 60$
	School with Drinking Water facility
	School with Common Toilet
	Schools with Girl's Toilet
TEACHERS	Percentage of Female Teachers
	Pupil-Teacher Ratio
	School with Pupil-Teacher Ratio $\geq 60$
	Single-Teacher Schools (in schools with more than 15 students)
	Percentage of Schools with $\leq 3$ teachers
	Teachers without Professional Qualification
OUTCOMES	Gross Enrolment Ratio - Overall
	Participation of Scheduled Castes Children: Percentage SC Population (2001 Census) - Percentage SC Enrolment
	Participation of Scheduled Tribes Children: Percentage ST Population (2001 Census) - Percentage ST Enrolment
	Gender Parity Index in Enrolment
	Repetition Rate
	Drop-out Rate*
	Ratio of Exit Class over Class I Enrolment (only at Primary stage)
	Percentage of Passed Children to Total Enrolment
	Percentage of Appeared Children passing with 60 per cent and more marks

**Note:**

- Indicators used for constructing EDI were pre-determined by the MHRD, Government of India.
  - Indicators were normalized before the Principal Component Analysis was applied to decide the factor loadings and weights.
  - Separate dimensional indices were constructed first before finalizing the EDI; and
- \* Number of access-less habitations has been obtained from the Seventh All India Education Survey and drop-out rate at Upper Primary level from the Selected Educational Statistics. Wherever necessary projected child population provided by the Office of the Registrar General of India has been used.

## Assumptions used in Computing EDI

An effort has been made by the National University of Educational Planning and Administration (NUEPA) and the Government of India (MHRD, Department of School Education and Literacy) to compute an Educational Development Index (EDI), separately for Primary and Upper Primary levels of education and also a composite index for the entire Elementary education which is exclusively based on the DISE data for the year 2007-08.

A set of 23 indicators have been used in computing EDI which are re-grouped into the four sub-groups, namely Access, Infrastructure, Teachers and Outcome indicators. The Indicators used for constructing EDI were pre-determined by a Working Group on EDI constituted by the MHRD during 2005-06 of which like other institutional members, NUEPA was also a member. In the present year, improved versions of a few variables were used. Percentage of access-less habitation was one such variable which is latest available for the year 2002-03. In view of a large number of schools that have been opened across the country in the recent past, the same was corrected with reference to new schools (government) opened since 2002-03. Similarly, in place of schools without drinking water facility, schools with drinking water facility has been used as a positive variable. In place of Gross Enrolment Ratio of SC/ST population, percentage of SC/ST population (to total population, 2001 Census) minus percentage of SC/ST share of enrolment in Primary and Upper Primary classes has been used to assess participation of SC/ST children.

After data was cleaned, each indicator was *normalised* by using the following formula:

$$NV_{ij} = 1 - \frac{\{Best\ X_i - Observed\ X_{ij}\}}{\{Best\ X_i - Worst\ X_i\}}$$

Upon receiving *normalised values*, *Principal Component Analysis* (PCA) was applied to decide the factor loading and weights. Unlike previous years, in case of a few variables, policy options were explored to identify the *best values* instead of based on the *observed values*. Some of these variables are: access-less habitations (best value, zero), average pupil-teacher and students-classroom ratio (best value, 40), drop out rate (best value, zero), percentage of schools having PTR and SCR 60 and above (best value, zero), percentage single-teacher schools (best value, zero), percentage of teachers without professional qualification (best value, zero) etc. Because of this, EDI in 2007-08 may not necessarily be comparable with the same in the previous year.

**Educational Development Index: Primary Level

*“It must be conceded that the DISE does represent a significant advancement over the earlier systems of data collection, compilation, analysis and, publications. In terms of reduction of time-lag and improvement of quality, the DISE represents a phenomenal stride over all the other systems.”*

*“Since the DISE has been widely accepted, it must become the only system. In fact, it must become the only and the regular system and shall be upgraded to cover Secondary and Senior Secondary stages also.”*

Report of the Review Committee on Educational Statistics  
Ministry of Human Resource Development  
Government of India  
*December 2008*

# **One Million+ School Report Cards**

([www.schoolreportcards.in](http://www.schoolreportcards.in))

The National University of Educational Planning and Administration has created a comprehensive database on elementary education in India under one of its most prestigious projects, known as, District Information System for Education (DISE). The project covers both Primary and Upper Primary schools/sections of all the districts of the country. What is more remarkable about DISE is that it has completely eliminated the time-lag in availability of educational statistics which has come down drastically from 7-8 years to less than a year at the national and only a few months at the district and state levels. DISE is supported by the Ministry of Human Resource Development and UNICEF.

The National University has successfully developed School Report Cards of more than 1.25 million Primary and Upper Primary schools/ sections. In addition to quantitative information, the Report Cards also provide qualitative information and a descriptive report about individual schools. And, all that can now be accessed with the Click of a Mouse. Even school-specific raw data has also been provided online to users.

The Report Cards are produced to provide users comprehensive information on all the vital parameters, be it student, teacher or school related variables, yet concise, accurate information about each school in a standard format which is easy to understand and allows meaningful comparisons to be made among schools. We hope that these reports are used in constructive conversations which lead to improved education for all children across the Country.
