Introduction

India is home to 17% of the World's total population accommodated in an area which is 2.4% of the World's total area. As against 2820 languages in the entire world, as many as 325 languages are effectively used in India alone. Local dialects change in India almost after every 8-10 Kms. The country has witnessed phenomenal educational development – both in quantitative and qualitative terms, since independence. However, the national goals of universal elementary education and total eradication of illiteracy have still remained elusive. The Government is committed to achieving these national goals and has been steadily increasing the budgetary allocation for education. The country has also made significant strides in higher and technical education.

Statement-1 compares the population, area, density and literacy rates in India and some of its neighbouring countries. Afghanistan with 63.75% adult illiterates is at the top, closely followed by Bangladesh, Nepal and Pakistan.

GER of all categories of students:

The Gross Enrolment Ratios for the Primary (class I-V), upper primary (class VI-VIII) and Elementary (I-VIII) stage in respect of all categories of students are presented below in **Statement-4.1**. State wise details for 2004-2005 are given in **Table- 8.**

6 Gender Parity Index:

Gender Parity Index (GPI) is calculated by dividing girl's GER by boy's GER of a given level of education. It measures progress towards gender equity in education. When the GPI shows a value equal to 1 at any level of education it shows that there is no gender disparity at that level and learning opportunities are available for girls equally to that of boys.

All Category of students: **Statement-6.1** indicates the gradual increase in Gender Parity Index in primary and upper primary stages of school education. It has increased from 0.41 in 1950-51 to 0.95 in 2004-2005 at primary stage, it increased from 0.22 to 0.88 and from 0.38 to 0.93 at upper primary and elementary stages respectively. GPI is higher at primary stage than at upper primary stage. It shows that gender disparity is higher at upper primary stage than at primary stage. Details are given in **Table 14.**

7. Drop-out Rates:

The Drop-out Rate represent percentage of pupils who drop out from a given grade or cycle or level of education in a given school year. The method used to calculate Drop-out Rates is known as the **Apparent Cohort Method**. There are certain limitations of this method in providing precise estimates, as it does not take into account the data on repeaters.

All Categories of students: The rates of drop out have decreased from 64.9% in 1960-61 to 29.00% in 2004-2005 in primary classes. The rate of dropouts which was 78.3% in 1960-61, has come down to 50.84% in 2004-2005 in the upper primary classes. Similarly, the dropout rate which was 82.5% in 1980-81, has decreased to 61.92% in 2004-2005 in the secondary classes, implying an improvement in retention rates as would be evident from Statement-**7.1.** State wise/ stage wise Gross Drop out Rates for the year 2004-2005 are given in **Table 17.**

Pupil Teacher Ratio (PTR):

On the basis of the school enrolment and the number of teachers, the Pupil Teacher Ratio (PTR) for the years after independence is indicated in **Statement-8.2**. At the time of independence there was a widespread dearth of educational institutions in the country and the utilization of institutions was also not optimum. During the year 1950-51 the Pupil Teacher Ratio in primary schools was 1:24, in middle schools it was 1:20 and in High and Higher Secondary schools, the PTR was 1:21. In 2004-2005 this ratio has now increased to 1:46 in primary schools; 1:35 in upper primary schools and 1:33 in Sec. and Sr. Secondary Schools. Though the number of educational institutions has considerably increased after independence and also the number of teachers, the higher PTR indicates that the increase in enrolment at each level is comparatively is more than the increase in number of teachers. The increased enrolment at various levels also underscores the need for opening of a greater number of educational institutions as well as employing more teachers for improving the quality of education. State wise details of Pupil Teacher Ratio in the year 2004-2005 are given in **Table-20**.

10. Population

Growth of Population: The population of India, stood at 1,028,610,328 comprising of 532,156,772 males and 496,453,556 females according to Census of India, 2001. India became only the second country in the world after China to officially cross the one billion mark. The estimated global population in 2003 was 6272 million.

The population of India has increased by 182.3 million during the decade 1991-2001 in absolute terms, which is more than the estimated population of Brazil, the fifth most populous country in the world. Although, the net addition in population during each decade has increased consistently, the change in net addition has shown a steady declining trend over the decades starting from 1961. While 27.8 million more people were added between the decades 1981-91 then between 1971-81, this number declined to 19.3 million for the decades between 1981-91 and 1991-2001. This implies that although India continues to grow in size, its pace of net addition is on the decrease.

The percentage decadal growth during 1991-2001 has registered the sharpest decline since independence. It has declined from 23.85 percent for 1981-1991 to 21.54 percent for the period 1991-2001, a decrease of 2.31-percentage point. The average exponential growth rate for the corresponding period declined from 2.16 percent per annum to 1.97 percent per annum.. Population growth since 1901 is given below in **Statement-10.1**

12. Attendance Rates: (NSS 61st Round Survey Report No. 517)

Current Attendance

As per the NSS 61st Round Survey Report No. 517, the current attendance status refers to whether a person was attending any educational institution on the date of survey and was collected for each individual of age below 30 years from the respondent household. It may differ from the formal attendance status ascertained from or reported by educational institution. In the report persons are classified as attending or not attending; if not attending, it was ascertained whether one ever attended or never attended. Those who were attending were again classified according to the level of attendance: pre-primary, primary and post-primary.

Statement 12.1 given below presents the distribution of persons of age 5-29 years by status of current attendance separately for each sex at the all-India level. It is found that about 50 per cent of the people in the age- group 5-29 years was currently attending educational institution. The said proportion was a little higher for males at 53 per cent than for females (46 per cent). Similar patterns, as in the case for literates, exist over rural-urban and male-female categories. The current attendance rate is found to be the highest among urban males (54 per cent) and lowest among the rural females (44 per cent). On the other hand, among persons who were not currently attending, about 35 per cent never attended any educational institution. This proportion is found to be the lowest among the urban males (17 per cent) and the highest among rural females (47 per cent).

Current Attendance and Level of Education:

Statement 12.2 gives the distribution of currently attending persons of age 5-29 years by level of education and drop-out rate (per 1000) at 'middle' level for all-India. It may be seen that about 49 per cent were attending at the primary level, 22 per cent in the next middle level. It is seen that the drop-out rate at the 'middle' level is the highest in the case of rural females (60 per cent), closely followed by rural males (55 per cent) and lowest in the case of urban females (42 per cent).

Current Attendance by Type of Institution:

Statement 12.3 gives the per 1000 distribution of persons in the age group 5-29 years who were attending educational institution by type of institution for all-India. It is seen that Government institutions accounted for 63 per cent of the students (i.e., those who were attending), followed by private unaided institutions (17 per cent), private aided institutions (14 per cent) and local body institutions (only 6 per cent).

Type of institution and level of education: **Statement 12.4** gives the per 1000 distribution of persons in the age group 5-29 years who were attending educational institution by type of institution for each level of current attendance at the all-India level. Two important observations can be noted from Statement 3.18. In rural areas, the percentage share of government institutions or the local body institutions among the students generally decreases as the level of education increases and the fall is compensated by the private institution, particularly by the aided one. Contrary to this, in the urban areas, the percentage share of government institutions generally increases and the share of government institutions generally increases and the share of local body institutions decreases as the level of education increases. In the urban areas, private aided institutions played an important role at the secondary, higher secondary and also at higher education levels, just next to government institutions, whereas the role of private unaided institutions in providing services at the primary and middle level was just next to government institutions.

Expenditure By Level of Education:

Table 35 gives the details of expenditures by level of education in India and its percentage to GDP and total Government expenditure on all sectors during the period 1990-91 to 2004-05. The expenditure on elementary education was 1.78% to GDP in 1990-91. The percentage expenditure on elementary education to GDP after a gradual rise and fall has remained almost same i.e. 1.89% in 2004-05. The percentage expenditure to GDP on secondary/higher secondary shows an irregular rise and fall and it has remained between 1.13 to 1.11 percent during 1997- 98 to 2004-2005. The percentage expenditure to GDP on Adult Education was 0.05% during 1990-91 showing a gradual decrease to 0.01% in 2000-2001. It improved slightly to 0.02% during 2004-2005. The percentage expenditure on University and Higher Education to GDP, which was 0.77 % in 1990-91 shows a gradual decrease to 0.62% in 1997-98 and rises to 0.66% in 2004-2005.

The share of expenditure on Elementary Education to total expenditure on all sectors was 6.19% during 1990-91 and which shows irregular rise and fall and is 6.57% in 2004-2005. The share of Secondary and Higher Secondary Education to total expenditure on all sectors was highest in 1999-2000 i.e. 4.97% and the lowest (3.85%) during 2004-2005. The share of adult expenditure to total expenditure on all sectors was highest in 1990-91 (0.19%) and shows a gradual decreasing trend to 0.05% in 2004-05. The percentage share of higher education to total expenditure remained between 2.31% to 2.30% in the last decade.

Budgeted expenditure (Revenue Account) on Education

The per capita budgeted expenditure during 2004-05 was highest in Lakshwadweep (Rs.3967.65) followed by A&N Islands (Rs.3044.50), Sikkim (Rs2927.81), and lowest in Bihar (Rs.488.45). The percentage of Budgeted expenditure on education to the total State Budget was highest in Delhi (28.06%) followed by Tripura (25.63%) and Bihar (25.01%). The details may be seen in **Table-36.**

Public expenditure on education: The public expenditure on education in India during the period 1961-62 to 2004-2005 is given in **Table 37**. The percentage expenditure to GDP shows an irregular rise and fall. It rose to 2.33% in 1972-73 but in 1973-74 declined to 2.15%. It increased to 3.07% in 1979-80 and decreased to 2.83% in 1981-82. Continuing to rise and fall slightly, it has reached a level of 4.33% in 2000-01 and then

slightly decreased to 3.68 in 2004-05. Similarly, the percentage of expenditure on education and training to total expenditure of all sectors during the period 1961-62 to 2004-2005 indicates that it has increased from 11.70% in 1961-62 to 14.60% in 1999-2000 and then declined to 12.76% in 2004-2005.
