#### **Foreword**

evelopment of a sound information system is critical for successful monitoring and implementation of any programme, particularly in social sectors. Design of a school information system has, therefore, been accorded priority from the very beginning of the District Primary Education Programme, as a result of which the District Information System for Education (DISE) was developed by the National University of Educational Planning and Administration (NUEPA), New Delhi. When *Sarva Shiksha Abhiyan* (SSA) was launched in 2001, not only was the coverage extended to all States & Districts of the country, its scope was also expanded to the entire elementary level of education. I am confident that DISE will play an important role in monitoring the *Right of Children to Free and Compulsory Education Act*, 2009 in years that follow.

I am happy to note that DISE has become a regular source of information on all aspects of elementary education and, through it, information is available at all disaggregated levels such as school, cluster, block, district, state and national level. NUEPA used to bring out a set of eight annual publications including 'District and State Report Cards', 'Elementary Education in Rural and Urban India', 'DISE Flash Statistics including Educational Development Index', and 'Elementary Education in India: Progress towards UEE, Analytical Reports & Tables', which data-users and researchers found very useful. I am sure that anyone interested in the Indian education system will find the present publication a valuable resource.

The year 2010 is special for DISE because its project, www.schoolreportcards.in has received two National Awards: E-Governance 2010 (Department of Administrative Reforms and Public Grievances, Ministry of Personnel, Public Grievances and Pensions, GoI) and eINDIA 2010 (Department of Information Technology, Ministry of Communication & IT, GoI) and also Manthan Award South Asia 2010. I congratulate all those involved in the process of strengthening EMIS in the country.

I thank NUEPA, especially Dr. Arun C. Mehta, Professor and Head, Department of EMIS and entire DISE team, for bringing out the present publication. I also thank UNICEF, Delhi, for consistently supporting EMIS activities since 1995.

(Anshu Vaish)

#### From the Vice-Chancellor's Desk

am happy to observe that the process of strengthening EMIS initiated in 1995 has covered all the districts and states of the country and MIS Units have been established at both these levels and similar units are being established at the block level. The time-lag in availability of educational statistics has come down to less than a year at the national level and only few months at state and district levels. I am confident that DISE would play an important role in monitoring the implementation of *Right to Education Act*. In fact, the data capture format and information collection processes have already been suitably modified.

Besides launching one million plus School Report Cards, a set of eight publications exclusively based on the DISE data are being brought out by the National University each year. It is a great pleasure for me to present (a) DISE Flash Statistics; (b) Elementary Education in India: Where Do We Stand; District & State Report Cards, (c) Analytical Report & Analytical Tables, and (d) Elementary Education in Rural & Urban India which together encompass different aspects of universalisation of elementary education for the past more than eight years.

I take this opportunity to congratulate everyone involved in strengthening of MIS at various levels and for winning three prestigious National Awards (e-Governance, eINDIA and Manthan South Asia) in 2010. I thank the DISE team led by Prof. Arun C. Mehta for bringing out this publication. I hope that researchers, policy makers, administrators and planners will find the publication both informative and useful.

(R Govinda)

New Delhi January, 2011

# Acknowledgements

or the last several years, NUEPA has been actively involved in strengthening Educational Management Information System (EMIS) in the country. The *Elementary Education in India: State Report Cards, 2008-09* is based on the data received from all the 35 States and Union Territories of the country. The publication presents not only the data up to elementary level but also brings in many new dimensions of elementary education into focus. It incorporates data on children with disabilities, mediums of instruction, students' flow including transition and retention rates, teachers, utilisation of school development and TLM grants, and many other parameters on which much information is not available from other sources.

The *State Report Cards* is based on the data received from as many as 1.3 million schools spread over 633 districts across 35 States & UTs. The study of this magnitude cannot be completed without the active involvement and participation of the EMIS professionals at the national and sub-national levels. I am extremely thankful to all the State Project Directors, the state level EMIS coordinators and district level programmers and data entry operators for timely supply of data.

I take this opportunity to thank UNICEF, Delhi, for consistently supporting EMIS activities ever since the inception of DISE and Ms Anita Kaul, Additional Secretary, Department of School Education & Literacy, Government of India, who played a crucial role in facilitating the implementation of DISE in various states. The contribution of Shri P. K. Tiwari, Director (SE & L), is also gratefully acknowledged.

I am thankful to Prof. R Govinda, Vice-Chancellor, NUEPA, for guidance, encouragement and consistent support to DISE activities. We hope to receive his continued support to DISE activities at NUEPA.

Thanks are due to Shri Naveen Bhatia, Computer Programmer, NUEPA for facilitating the preparation of State Report Cards. I am thankful to Shri Shalendar Sharma, Chief Consultant (MIS), Technical Support Group, MHRD for designing the report cards and also for keeping liaison with the states which helped us enormously in timely collection of data. I am also thankful to Ms Shakun Sethi and Ms Aseela M for their able assistance and colleagues in the publication unit, especially Shri Pramod Rawat and Ms Sheeja Biju, for timely bringing out the publication.

We are encouraged by the enormous number of comments received from data users and hope that the present publication will also be received well by education planners, policy formulators and researchers. Any suggestion for improvement is most welcome.

## Major Findings

#### 1. Introduction

- 1.1 The National University of Educational Planning and Administration has created a comprehensive database on elementary education in India known as District Information System for Education (DISE), under one of its most prestigious projects. The project covers both primary and upper primary schools/ sections of all the districts of the country. The MIS Units are now operational both at the district and state levels and are equipped with necessary hardware and software. A number of states are now in the process of setting up of MIS Units at the block level. The DISE software is operational in all the districts of the country and is providing vital information for policy formulation and preparation of district elementary education plans. What is more remarkable about DISE is that it has drastically reduced the time-lag in the availability of educational statistics which is now down from 7-8 years to less than a year at the national level and only a few months at the district and state levels.
- 1.2 The National University has successfully developed School Report Cards (www.schoolreportcards.in) of more than 1.3 million primary and upper primary schools/sections, and is available for five years i.e. 2005-06 to 2009-10. In addition to quantitative information, the Report Cards also provide qualitative information and descriptive reports about individual schools. And, all this information can now be accessed on the click of a mouse. The Report Cards provide the users comprehensive information on all the vital parameters, be it student, teacher or school related variables, in concise, accurate and standard format which is easy to understand and allows meaningful comparisons to be made among schools.
- 1.3 DISE Users can also download raw data as per their requirement for further empirical studies. All DISE publications, such as 'District and State Report Cards', 'Elementary Education in Rural and Urban India', 'DISE Flash Statistics including Educational Development Index', and 'Elementary Education in India: Progress towards UEE, Analytical Reports', are available at <a href="https://www.dise.in">www.dise.in</a>. Publications based on DISE data brought out during the last five years have also been provided in the Compact Disk.
- 1.4 School Report Cards under the Project DISE: A joint project of NUEPA and Department of School Education and Literacy, Ministry of HRD, GoI is the recipient of e-Governance 2010 & eINDIA 2010 National Awards and Manthan Award South Asia 2010.
- 1.5 Despite significant increase in the number of schools covered, a few schools, are yet to be covered under DISE for which rigorous efforts have been made to reach all such schools. To further improve the quality of data, it has now been made mandatory for all the states to check the data on five percent random sample basis through an independent agency (mostly ICSSR funded institutions and University Education Departments) each year. States are advised to initiate corrective measures in the light of the findings of sample checking of data. In addition, NUEPA has also launched Post Enumeration Survey of DISE data initially in three states, which is likely to be expanded to remaining states in year that follows. All these efforts would not only help in improving the quality of data but would also help in ensuring complete coverage.
- 1.6 DISE software is now time-tested, user-friendly, menu-driven and error-free software being utilised throughout the country. Efforts are being made to further improve the software and review the existing Data Capture Format which has become important in view of the Right to Education Act.

#### 2 The Present Publication

- 2.1 A variety of schools and school-related indicators by school categories along with the average of all states covered under DISE in 2008-09, as also the selected indicators for previous years are presented in the present publication. The data presented in the document contain information on hundreds of variables, mostly by school category and wherever necessary by rural and urban areas, and management category. Practically, all such indicators on which information is required for formulating reliable elementary education plans are presented in 'ready-to-use form'.
- 2.2 The indicators presented in the present document can be divided into the following parts: School and Facility Indicators; Enrolment-Based Indicators; and Teacher-Related Indicators. The major highlights of *Elementary Education in India: Progress towards UEE*, 2008-09 are given in the following sections.

#### **3** School-Based Indicators

- 3.1 With the improved coverage, the number of schools/sections imparting elementary education covered under DISE increased many-fold. From 8,53,601 schools in 2002-03, their number has increased to 11,96,663 schools in 2006-07 and further to 12,50,775 schools in 2007-08 and 12,85,576 schools in 2008-09. Of the total schools, about 87.30 percent schools are located in the rural areas. During the same period, the number of primary schools increased from 6,01,866 to 8,09,108. Category-wise distribution of schools reveals that majority of the schools (62.94 percent) are independent primary schools.
- 3.2 The increase in the number of schools is also reflected in the ratio of primary to upper primary schools/ sections which clearly shows the impact of *Sarva Shiksha Abhiyan* under which a large number of schools have been opened in the recent past. This ratio for the year 2008-09 is one upper primary school/ section for every set of 2.27 primary schools/sections compared to 2.41 in 2007-08 and 2.45 schools/ sections in 2006-07. It is noticed that in about 16 states, the ratio of primary to upper primary schools/ sections is better than the national average of 2.27. Many of the states have the ratio equivalent to almost two, all of which suggests that by and large schooling facilities have been created and are available across the country. Despite significant improvement in the ratio, there are a few states, such as Arunachal Pradesh, Bihar, Meghalaya, Sikkim and West Bengal, where the ratio still needs to be improved significantly.
- 3.3 Obtaining data from all the private schools is a challenging task. Concerted efforts made by the National University have resulted in a significant increase in the number of such schools covered under DISE over a period of time. This is important to assess the true picture of universalisation of elementary education in the country. As many as 72,886 and 1,77,034 schools in 2008-09 were respectively being managed by the Private Aided and Private Unaided managements. DISE data also suggests that majority of the private schools are unaided schools (70.84 percent). The percentage of government and government aided schools is as high as 86.19 which show that nine out of every ten schools imparting elementary education in the country are funded by the government.
- 3.4 A significant achievement is that most of the new schools opened in the recent past have a school building. As many as 2,22,534 new schools have been opened since 2002-03 majority of which are located in the rural areas and 89 percent of these schools have been provided a school building. During the period 2002-03 to 2008-09, as many as 1,46,691 primary schools have been opened which is 18.13 percent of total primary schools in the country. More than 86 percent of such schools have been provided school building.
- 3.5 Not only the number of schools and schools with buildings has increased but the average number of instructional rooms has also increased across the country which is essential for smooth teaching-learning transaction. Irrespective of the school type, schools imparting elementary education across 633 districts in 2008-09 had an average of 4.4 classrooms, compared to 3.8 in 2005-06. However, a significant difference is noticed in average number of instructional rooms in primary schools located in rural areas (2.9 classrooms)

- and urban areas (4.8 classrooms) and also in government (2.8 classrooms) and private (5.0 classrooms) managed schools. About 72 percent classrooms in primary schools are in good condition and remaining 28 percent need either minor or major repairs.
- 3.6 Schools imparting elementary education across the country vary in size. There are about 8.74 and 17.11 percent schools which respectively have enrolment between 1-25 and 26-50. In view of there being a large number of small schools, there is a need to have separate programme for these schools. In view of the large number of such schools (about 26 percent of 1.3 million schools), the National University has undertaken a research study, exclusively based on the DISE data. It is hoped that the outcome of the study will help NUEPA in developing planning methodology for small schools.
- 3.6 Some of the salient highlights with regard to other school-based indicators are as follows:
  - 3.6.1 The distribution of schools by type of building shows that 71.94 percent primary schools have *pucca* (permanent) building as compared to 6.76 percent having partially *pucca* and another 3.44 percent having *kuchcha* (temporary) building. Efforts should be made to provide all schools a *pucca* school building.
  - 3.6.2 The percentage of single-classroom schools during 2004-05 to 2008-09 declined from 10.39 percent to 7.82 percent. However, the percentage of such primary schools is 11.62 percent. Despite the decline in percentage of single-classroom schools, there number in absolute terms is significant, which needs intervention without delay.
  - 3.6.3 Over a period of time, the student-classroom ratio has shown improvement. On an average about 35 students are sitting in one classroom in primary schools compared to 37 in the previous year. However, in case of primary schools, the student-classroom ratio in states of Bihar and Jharkhand (98 and 57 students per classroom) is still very high.

#### 4. Facility Indicators

- 4.1 Like number of schools, instructional rooms, ratio of primary to upper primary sections/schools and other indicators, facilities in schools have also improved significantly which is true for physical, ancillary and teaching-learning facilities. Availability of basic facilities in schools may not only attract more children to schools but also help in improving retention rate.
- 4.2 About 88 percent schools had drinking water facility available in 2008-09 compared to 83 percent in 2005-06. About 50 percent of the total schools had water hand pumps, and 23 percent of schools had tap water facility in school. Like drinking water facility, more schools now have common toilets and separate toilets for girls. About 67 percent schools had common toilets in schools in 2008-09, compared to 52 percent schools in 2005-06; and 54 percent schools in 2008-09 had separate toilets for girls compared to only 37 percent in 2005-06.
- 4.3 Some of the other major facilities available in schools are:
  - 4.3.1 During the period 2005-06 to 2008-09, the number of schools with computers increased impressively. As many as 1,81,528 schools reported to have a computer, which is 14.12 percent of the total schools. In absolute terms, Maharashtra has the highest number of schools (34,220 schools, 37.17 percent) with computers. The percentage of primary schools with computers is 5.76 percent compared to 13.96 percent in case of independent upper primary schools.
  - 4.3.2 The percentage of schools with ramps increased significantly from 17.14 percent in 2005-06 to 40.39 percent in 2008-09; this may help in attracting more physically challenged children to schools. Together with enrolment by nature of disability, DISE is perhaps the only source that provides comprehensive information about physically challenged children in schools.

- 4.3.3 Providing nutritious food to all children under the mid-day meal scheme is one of the ambitious programmes of the government. For the first time, a variable on availability of kitchen-shed in school was added to DISE during 2006-07. In 2007-08, it reveals that 36 percent of schools managed by the government (including aided schools) have kitchen-shed in school compared to 43 percent such schools in 2008-09. The percentage of such schools is 37 and 26 respectively in the rural and urban areas.
- 4.3.4 The percentage of primary schools having attached pre-primary section increased from 14.27 in 2002-03 to 23.63 in 2008-09. The number of such schools is more in urban areas than in rural areas.
- 4.3.5 Over a period of time, the number of schools receiving school development and TLM grants increased impressively (mostly government run schools). Compared to 7,24,682 schools that received school development grant in 2003-04, the corresponding figure in 2007-08 was as high as 8,82,745 schools (79.67 percent). The number of schools that received TLM grant has been as many as 7,92,585 (71.53 percent) of all types of schools. Majority of the states have utilized more than 90 percent of these funds.

#### **5.** Enrolment-Based Indicators

- 5.1 With the increased coverage of schools under DISE, enrolment both at the primary and upper primary level of education has also increased significantly. The enrolment increased from 101.16 million in 2002-03 to 131.85 million in 2006-07 and further to 134.38 million in 2008-09. The GER at primary level, based on the DISE data is estimated to be 115.31 percent, corresponding to 98.59 percent NER. A few states are near achieving the goal of universal primary enrolment. Over a period of time, enrolment in upper primary classes has also shown consistent increase. From a low of 47.89 million in 2006-07, it has increased to 53.35 million in 2008-09 (GER 73.74 percent).
- 5.2 Gender Parity Index (GPI) and percentage of girls' enrolment in primary and upper primary classes reveal that there is consistent improvement both in GPI and girls' share in enrolment. The average of 633 districts in 2008-09 indicates a GPI of 0.94 in primary classes and 0.91 in case of upper primary classes.
- 5.3 The improvement in girls' enrolment is also reflected in girls share to total enrolment. In primary classes, the share of girls' enrolment in 2008-09 was 48.38 percent compared to 48.22 percent in the previous year. Girls share in total enrolment at upper primary level is 47.58 percent; it was 46.99 percent in 2007-08 and 45.80 percent in 2005-06. The percentage of girls' enrolment in government managed schools was found to be higher than in private managed schools for both primary and upper primary enrolment.
- 5.4 At the primary level, the share of SC and ST enrolment with respect to total enrolment works out to 19.84 and 11.68 percent respectively. Notably, at all levels, government schools are the main providers of educational needs of both SC and ST children. SC and ST enrolment together had a share of 78.56 and 83.32 percent respectively, in government run primary and upper primary schools. The share of OBC enrolment in the primary and upper primary classes is 42.39 and 41.93 percent respectively which is similar to the same in the previous year.
- 5.5 During 2006-07 DISE data collection, an attempt was made to collect information on enrolment of Muslim children for the first time. In 2008-09, the percentage of Muslim enrolment at primary level is reported to be 11.03 against 9.13 at upper primary level. The percentage of girls' enrolment is as high as 48.93 (GPI, 0.96) and 50.03 (GPI, 1.00) at primary and upper primary levels. Preliminary analysis of data suggests that there are about 57 districts in the country which have 25 percent or more Muslim students in primary classes. Most of these districts are from the states of Assam, Jammu & Kashmir, Karnataka, Uttar Pradesh and West Bengal.
- 5.6 Much emphasis is being given to inclusive education. DISE is perhaps the only source that collects information on disabled children in elementary classes on regular basis by nature of disability. In 2008-09, about 1.38

- million disabled children were enrolled in elementary classes across the country, of which 1.00 million were in primary and 0.38 million in upper primary classes.
- 5.7 One of the essential requirements to achieve UEE is to retain students in the education system. The apparent survival rate (Ratio of Grade V to Grade I) improved to 76 percent in 2008-09. This is also reflected in retention rate at primary level which is estimated to be 74 percent.
- 5.8 With improvement in the number of schools, facilities in schools and enrolment, the dropout rate for cohort 2007-08 indicates an average rate of 8.02 percent in primary grades. A few states have almost achieved the goal of universal retention at primary level. The cohort survival rate (to Grade V) is estimated to 76 percent indicate that a good number of children dropping out in primary classes.
- 5.9 One of the other important indicators that are essential to achieve UEE is high transition from primary level to upper primary level of education. It has improved significantly from 64.48 percent in 2002-03 to 83.72 percent in 2005-06 but declined slightly to 82.68 percent in 2007-08.
- 5.10 Learner's achievement is considered as one of the important indicators of quality of education. Examination results at the terminal grades is a proxy indicator of learner's achievement. About 50.20 percent boys and 50.35 percent girls passed Grade IV/V with a score of 60 percent and above, compared to 42.55 percent boys and 43.56 percent girls scoring 60 percent and above marks in Grade VII/VIII; thus showing impressive improvement over the previous years.

#### 6. Teacher-Related Indicators

- 6.1 Availability of teachers in schools is an important variable for quality education. The total number of teachers in 2008-09 suggests that about 5.79 million teachers are engaged in teaching in schools imparting elementary education in the country. The data also shows appointment of a large number of teachers across the country consequent to the SSA interventions. All the schools in the country now have an average of 2 and more teachers. The all-India average reveals that, on an average, there were 4.5 teachers in a school in 2008-09 that imparts elementary education compared to an average of 3.0 teachers per primary school.
- 6.2 All schools together had 43.46 percent female teachers. Urban areas had higher percentage of female teachers than the rural areas; this is true for all school types. Irrespective of school types, a significant difference is also noticed in case of female teachers in schools under private and government managements.
- 6.3 Increase in the number of teachers is also reflected in the pupil-teacher ratio which has shown consistent improvement. PTR, both at primary and upper primary levels, is quite comfortable (primary, 34:1 and upper primary, 31:1) and is below 40:1. However, there are 146 districts in the country which still have a PTR of above 40:1 most of the districts of Bihar and Jharkhand falls under this category. At primary level, there are only four states which reported a PTR above 40. At upper primary level, Bihar reported a high PTR of 59:1, compared to 55:1 at primary level. In Bihar, it is not only PTR that is high but it has also reported a high student-classroom ratio of 98. With the appointment of a large number of teachers in the state, pupil-teacher ratio is expected to improve in the year that follows.
- 6.4 There are about 538 thousand contractual-teachers, constituting 9.39 percent of the total number of teachers. About 71, 494 schools have only contractual-teachers. About 48 percent male and 46 percent female contractual-teachers are Graduates and above. About 14.25 percent male and 12.76 percent female contractual-teachers have B.Ed or equivalent degrees.
- 6.5 The average age of teachers across states suggests that majority of the teachers in primary schools are between 26-45 years, which is also true for other types of schools. The percentage of teachers in the age group 18-25 years across school types has been low but has shown improvement over the previous year; it indicates newly recruited teachers are joining state education system. A little over 4 percent of the total teachers imparting elementary education are expected to retire during the next 2 to 3 years for which process of recruitment needs to be initiated well in advance.

- 6.6 The percentage of teachers involved in non-teaching assignments has been as low as 8.59 percent which shows that the majority of teachers were not involved in non-teaching assignments during the previous academic year. On an average, a teacher was involved in non-teaching assignments only for 15 days. In rural areas, teachers were involved in such assignments for 14 days compared to 18 days in urban areas.
- 6.7 DISE data reveals that government is the main employer of both Scheduled Castes and Scheduled Tribes teachers. The share of SC and ST teachers together in government schools is as high as 79.93 percent. As many as 0.71 million SC and 0.55 million ST teachers are engaged in imparting elementary education, respectively representing 12.31 percent and 9.46 percent of the total teachers.

#### 7. DISE: Marching Ahead

- 7.1 Through DISE efforts, information on all aspects of universalisation of education is now available at disaggregated levels which can be used in different ways. The present document has highlighted a number of issues which can be tracked by using DISE data at different levels. Up-to-date information is now available at all desired levels in ready-to-use form. Detailed information is available by school category, management, location, type of schools and wherever necessary, is separately available by gender. The same is also separately available for primary and upper primary levels of education.
- 7.2 In view of the data now being available at school, cluster, block, district, state and national levels:
  - 7.2.1 Eevidence-based planning should be initiated at desired level.
  - 7.2.2 DISE data now being available over a period of time, trend analysis on areas of concern can be initiated.
  - 7.2.3 Studies on girls participation in educational programmes, enrolment, impact of infrastructure on learner's attainment, pupil-teacher ratio, contractual-teachers, impact of in-service training on classroom transaction, schools with high PTR and students-classroom ratio etc. can be undertaken exclusively based on DISE data.
  - 7.2.4 Individual schools lacking minimum facilities can be identified and tracked by using DISE data.
  - 7.2.5 One of the other important variables available under DISE is grade-wise enrolment and repeaters which can be of immense use in initiating internal efficiency of education system related studies.
  - 7.2.5 In a number of districts, since DISE data is now available over more than five years, studies concerning retention and transition rates can be undertaken.
  - 7.2.6 Perhaps DISE is the only source which disseminates age and grade matrix which can play an important role while planning for school places.
  - 7.2.7 Comprehensive profiles of 5. 8 million teachers are also being maintained under DISE, which can be used for developing meaningful in-service-training programmes.
- 7.3 DISE is expected to play a pivotal role in the years that follow which has become essential in view of the Right to Education Act for which necessary modifications have been made in DISE Data Capture Format.
- 7.4 Despite overall improvement, there are a few areas of concern which need to be accorded the top most priority in the following year.
  - 7.4.1 A good number of schools are single-teacher schools despite availability of an average of four teachers per school, all of which need serious intervention. May be rationalization of teachers is the only solution.
  - 7.4.2 Percentage of female teachers has improved but in a few states there number is not satisfactory and hence need improvement.
  - 7.4.3 Process of filling-up of vacant positions of teachers across the country may be initiated immediately.

- 7.4.4 Quite a good number of schools are left to contractual-teachers to manage school affairs. Studies should be initiated on the functioning of all such schools.
- 7.4.5 States with high ratio of primary to upper primary schools/sections may like to expand upper primary schooling facilities. All schools imparting elementary education across the country should be provided with minimum essential physical, ancillary and teaching-learning facilities. There are still locations where PTR is not satisfactory and a single-classroom has to accommodate a large number of pupils. Possibilities may be explored to provide additional classrooms to schools having high student-classroom ratio.
- 7.4.6 The average dropout rate being high at primary level, it needs to be checked, without which neither the goal of universal primary education nor elementary education can be achieved. This is also true for transition from primary to upper primary level of education. For that purpose, reason-specific child-centered strategies need to be adopted.
- 7.4.7 The quality of education in terms of examination results and learners' attainment across the country is not satisfactory. It may be improved through active participation of teachers. Useful in-service programmes can be of great help in improving classroom transaction. Identification of training needs and review of existing in-service programmes may be helpful in making these programmes more effective.
- 7.4.8 States may be advised to compute district-specific EDIs and analyse EDI values separately in case of access, infrastructure, teachers and outcome indicators and adopt appropriate strategies.

## Report Cards An Overview

#### 1. Introduction

The Sarva Shiksha Abhiyan (SSA) envisages achieving goal of universal elementary education. In order to operationalise this premise into reality, considerable amount of educational and allied data is required. It was in this context that the District Information System for Education (DISE) was designed to provide district and subdistrict level school data for planning, monitoring and review of various project interventions. The DISE data received from schools are computerized at the district level and disseminated up to the school level in various ways. The data capture formats; definitions and concepts used for data collection are available at www.dise.in which is being followed uniformly across states.

#### 2. State Report Cards

The State Report Cards are based on the data received from about 1.29 million schools spread over 633 districts across the 35 States & UTs of the country. The State Report Cards: 2008-09 incorporate information on the following important areas of elementary education:

- a) Basic data on area, population, decadal growth rate, urban population, 0-6 population, SC & ST population, male & female literacy rate and sex ratio and number of districts, blocks, villages, clusters and schools from which data is reported.
- b) Key data on elementary education in terms of number of schools, enrolment and teachers classified by school-category and school management (Government & Private). Details of schools and enrolment in rural areas are also made available category-wise and management-wise.
- c) Grade, level and gender-wise enrolment along with percentage of over-age and under-age children at primary and upper primary levels of education in each state.
- d) Examination results for the previous academic session for the terminal class at primary and upper primary levels of education.
- e) Classrooms categorised into good condition, requiring minor and major repairs by school category.
- f) Number of schools by category and by type of building.
- g) Distribution of regular and contractual-teachers by educational and professional qualifications and by school category.
- h) Sex-wise enrolment of children with disabilities in primary and upper primary classes.
- i) Enrolment by mediums of instruction and by school category.
- j) Sex-wise number of students benefited by various incentive schemes at primary and upper primary levels.
- k) Grade-specific repetition rate at primary and upper primary levels of education. This has been presented for the states having at least 2 years DISE data on the basis of common schools.

- I) Apparent survival rate (Ratio of enrolment in Grade V to Grade I) in primary grades, transition from primary to upper primary level and retention rate at the primary level. Transition rate is presented in case of states having at least 2 years data and retention in case of districts in a state having 4/5 years DISE data.
- m) Performance indicators in terms of school category, enrolment distribution: total, Scheduled Castes, Scheduled Tribes, Other Backward Classes, Muslim Minority, percentage of girls enrolment and schools with enrolment 50 and below, classrooms, schools with classroom 60 and above, single-teacher schools, no female teacher schools, schools with attached pre-primary classes etc.
- n) Quality indicators according to category of schools, teacher-pupil ratio, average number of teachers, availability of female teachers, school buildings, students-classroom ratio, common toilets, girl's toilets, kitchen-shed, average number of instructional days, average number of days spent on non-teaching assignments during the previous academic year etc; and
- o) Number of schools received and utilized school development and teaching learning material grant by school category.

#### 3. Methodology and Sources of Data

The Report Cards are based on the school level data provided by the State Project/Mission Directors to the Department of School Education and Literacy of the MHRD. The data are first cross-checked and validated at the district and then at the state level. After the state is satisfied with the quality and reporting of the data, it is submitted to the national level for analysis, dissemination and reporting to various project management agencies.

#### 3.1 Indicators and their Formulation

The Report Cards contain both absolute data and percentage on selected indicators. For the purpose of presentation and ease of understanding and interpretation, certain classificatory variables are regrouped. The following paragraphs provide information on the variables where regrouping has been done for the purpose of presentation in the Report Cards:

- a) School management: The State Report Cards present data on management in terms of Government and Private category. The Government category includes all schools under the management of the Government (Central/State), Tribal and Social Welfare Departments and Local Bodies. The private category includes schools classified as Private Aided and Private Unaided. It may be noted that DISE covers only recognized schools falling under the above categories. Unrecognized schools are not included in the DISE information collection system.
- b) School buildings: The classification of schools is also presented in terms of the number of school buildings and their type. Schools having more than one type of building structures are counted under the category of 'Multiple Type Building'.
- c) *Teachers in position:* The distribution of teachers in terms of educational qualifications has been presented separately for teachers and *contractual-teachers*. In addition, teachers received in-service training during the previous academic year is also presented which includes both regular as well as *contractual-teachers*.
- d) Mediums of instruction: The State Report Cards present the number of children studying through various mediums of instruction by category of schools. The data for four major mediums of instruction are presented in the Report Cards and if a state has more than four mediums of instruction, these have been presented under the category, 'Others'. However, under reporting of enrolment by mediums of instruction is observed in a few districts across states. Hence, the same may not present the true picture of enrolment by mediums of instruction and be treated as incomplete and is applicable to schools those who have reported information and not to all the schools in the state.

e) Schools, villages, districts, blocks and clusters: The number of districts, blocks, villages and schools is based on the initialized entities in the DISE software. The list of districts, blocks, villages and schools is created at the time of DISE implementation and is updated annually. The number of clusters refers to the mapped entities with the blocks. Some states have often reorganized clusters. Towns and municipalities have been classified as separate blocks.

The main indicators presented in the State Report Cards have been derived by using the following illustrative formulae. The derivations are given for schools in primary category only. The same method is applied for other categories and classificatory groups.

1.	% Single-classroom schools =	Primary schools having single classroom	x 100
1.	// Single-classicom schools =	Total primary schools	X 100
2.	% Single-teacher schools =	Primary schools with single teacher in position	x 100
۷.	70 Single-teacher schools –	Total primary schools	X 100
3.	% Schools with SCR $\geq 60$ =	Primary schools having student classroom ratio ≥ 60	x 100
3.	% Schools with SCR ≥ 00 =	Total primary schools	X 100
4.	% Schools with pre-primary =	Primary schools having pre-primary sections	x 100
4.	sections with pre-primary =	Total primary schools	X 100
5.	% Schools with common =	Primary schools having common toilet	x 100
٦.	toilet	Total primary schools	X 100
6.	% Schools with girl's toilet =	Primary schools having girls toilet	x 100
0.	% denotes with girls tollet	Total primary schools	X 100
		Enrolment in primary schools having Education Department, Local Body, Tribal Welfare	
7.	% Enrolment in Government =	Department & Others as school management	x 100
7.	Schools	Total enrolment in primary schools	X 100
8.	% Enrolment in Private =	Enrolment in primary schools having Private Aided and Private Unaided as school management	x 100
ο.	Schools =	Total enrolment in primary schools	X 100

9. % Enrolment in single-teacher	_	Enrolment in primary schools having single teacher	x 100
schools	_	Enrolment in total number of schools having primary category	X 100
		Primary schools having teacher ≥ 2	
		but no female teacher	
10. % No female teacher schools (teacher ≥ 2)	=	Total primary schools	x 100
11 0/ Under one & even one children		nrolment in Grades I-V below '6' & above '11' years	v. 100
11. % Under-age & over-age childre	n =	Total enrolment in Grades I-V	X 100
10.00.00		Enrolment of SC in primary classes	100
12. % SC enrolment	=	Total enrolment in primary classes	x 100
		Enrolment of SC girls in primary classes	100
13. % SC girls to SC enrolment	=	SC enrolment in primary classes	x 100
14 % OT 1		Enrolment of ST in primary classes	100
14. % ST enrolment	=	Total enrolment in primary classes	x 100
15 0/ CT cirls to CT annulment		Enrolment of ST girls in primary classes	v 100
15. % ST girls to ST enrolment	=	ST enrolment in primary classes	x 100
		Total enrolment in schools of primary category	
16. Pupil-Teacher Ratio (PTR)	=	Total teachers in primary schools category	
(Contractual-teachers have been inclu	ıded	while calculating PTR)	
		Total enrolment in primary schools	
17. Student-Classroom Ratio (SCR)	=	Total classrooms in primary schools	

# Number of primary schools having enrolment ≤ 50 in Grades I - IV/V

x 100

18. % Schools with 
$$\leq 50$$
 = Students in Grades I - IV/V Total primary schools

(Contractual-teachers have been included while calculating this indicator)

(The denominator excludes the schools for which year of establishment is not given)

#### 22. Flow Rates

(a) Promotion Rate

Promotion Rate 
$$(p_g^t) = \frac{P_{g+1}^{t+1}}{E_g^t} \times 100$$

where

 $P_{g+1}^{t+1} = Number of students promoted to grade 'g+1' in year 't+1' and$ 

 $E_g^t$  = Total number of students in grade 'g' in year 't'

(b) Repetition Rate

$$(r_g^t) = \frac{R_g^{t+1}}{E_g^t} \times 100$$

where

$$R_g^{t+1}$$
 = Number of repeaters in grade 'g' in year 't +1'

(c) Dropout Rate

$$(d_{g}^{t}) = \underbrace{D_{g}^{t}}_{x 100}$$

where

d<sup>t</sup> = Number of students dropping out from grade 'g' in year 't'

(d) Transition Rate (TR)

$$TR = \frac{E_{g+1}^{t+1}}{E_{g}^{t}} \times 100$$

where

(e) Retention Rate (RR)

Enrolment in Grade IV/V in year 't' - Repeaters in Grade IV/V in year 't'

$$RR = \frac{IV/V \text{ in year 't'}}{Enrolment in Grade I in year 't - 3'/'t - 4'} \times 100$$

23. Average Promotion, Repetition and Dropout rates present average of these rates in Primary Classes and is calculated by using the standard methods based on common schools.

25. Ratio of Primary to Upper Primary Schools/Sections

- 28. In-service Training, School Development & TLM Grants received, Incentives in terms of number of beneficiaries, Examination Results etc. are presented for the previous academic year.
- 29. Percentage of teachers in different age-groups is presented only for teachers under Government managements.
- 30. Average number of days teachers spent on non-teaching assignments is applicable to only those teachers who were assigned non-teaching assignments and not to all the teachers.

#### 4. Coverage: Some Facts

Record date : 30th September 2008

Grades covered : 1 to 7 or 8 (depending upon the duration of

elementary education cycle)

Total states : 35

Total districts : 633 (including bifurcated districts)

Total schools : 12,85,576

■ Total students : 187.73 million

Total teachers : 5.79 million (including *para*-teachers)

■ Total contractual-teachers : 5,38,026

Number of repeaters : 9.45 million

Number of students with disabilities : 1.38 million

#### 5. Limitations of the Data

Raw data presented in the document or used for calculating indicators are essentially based on data provided by the State Project Offices through annual data collection (30<sup>th</sup> September 2008) under SSA (DISE). NUEPA is committed to provide professional and software support to all States and UTs as well as for dissemination and analysis of data as it is provided by the individual States and UTs. In no way, it is involved in data collection as such and therefore the accuracy and truthfulness of the data rest with the State/UTs. The data is provided by the State Project/Mission Directors through the Technical Support Group of the Department of School Education and Literacy, MHRD. All the States have certified that data is free from errors and inconsistencies. The data was supposed to be first cross-checked and validated at the district and then at the state level. Before that, the Cluster Resource Centre Coordinator was supposed

to thoroughly check the filled-in formats received from the schools falling under his or her jurisdiction. CRC coordinators are made accountable to ensure that data is consistent and there are no missing values. Before the formats are passed on to the block level, they are also supposed to ensure that the coverage is complete and to certify that the data is free from all inconsistencies and errors. Similarly, consistency module provided in the DISE software was required to run at the district level. After the state is satisfied with the quality and reporting of the data, the data was submitted for dissemination and analysis at the national level. From the national level, feedback on data quality was provided to all the States and UTs, district-wise in case of key variables, such as schools, teachers and enrolment.

Procedures for the data validation and verification of sample data capture formats at the district level have been prescribed, and the districts reported the steps taken by them to ensure quality and reliability of data collection. The DISE software also checks for internal inconsistencies in the data and generates reports for verification by the District Project Office. The State Project Office while transferring the data from the district to the state database ensures that the data received from the district is complete, consistent and free from errors. At the national level, data from the State Project Office is received to ensure compliance with various quality control measures. Despite these efforts, some inconsistencies and missing data are observed at the national level. A few schools have not responded to all the classificatory variables like management, year of establishment, rural/urban classification, school category, building status, academic and professional qualifications of teachers, and caste and sex code for teachers. Wherever possible, efforts are made to analyse the data by excluding the no-response values. However, in some cases, the 'no-responses' are explicit from the tables and hence the totals may not match across various tables due to different number of no-responses. In cross-tabulation analysis, the no-responses are excluded.

Needless to mention that the percentages, rates and ratios presented in the report are based on the schools that have responded to a particular question and hence may not be applicable to the entire state. Thus, schools by management, there location in rural and urban areas, type of schools, schools by category, enrolment (general, SC. ST, OBC, Muslim and by medium of instructions), pupil-teacher ratio, student-classroom ratio, percentage of girls in primary and upper primary classes and other such indicators should therefore be viewed in the light of these limitations.

Over a period of time, the number of schools covered under DISE increased significantly. During 2008-09, data has been collected from more than 1.29 million schools, with a comprehensive profile of more than 5.79 million teachers also being maintained by DISE. Despite best efforts, it is still possible that the field agencies might have not covered all the recognised schools imparting elementary education supposed to be covered under DISE which is specifically true for schools under private managements. A few states have collected data from these, it is still possible that the field agencies might have not covered all the recognised schools imparting elementary education supposed to be covered under DISE which is specifically true for schools under private managements. A few states have collected data from these schools while others might not have covered all such schools. Despite significant increase in number of private schools covered under DISE (250 thousand in 2008-09), field level functionaries reported that data from a few private unaided schools couldn't be obtained for the one or the other reason. We are trying to reach all such schools and are hopeful that these efforts would be reflected in the following year. In addition, un-recognised schools are not supposed to be covered under DISE which in a few states may be in large numbers. However, states like Andhra Pradesh and Punjab have extended the coverage of DISE to un-recognised schools in their states and collected information by using the DISE Data Capture Format.

It has also been observed that a few schools did not report age and grade matrix which is crucial in knowing the status of elementary education. A few states even did not report enrolment of Grade VIII because of the composition of school structure in the state. Therefore, enrolment in upper primary classes does not present the complete picture in Grades VI-VIII; thus GER and NER may not give correct portrayal of universalisation in such states and the same may be considered as percentage of children of an age-group enrolled in schools that reported data under DISE. The remaining children may either be out-of-school or enrolled in unrecognized schools, Education Guarantee Schools (EGS), non-formal education centers and other learning centers not covered under DISE. Irrespective of the school structure, enrolment ratio at the Primary level is based on Grades I-V and of the Upper Primary level, Grades VI-VIII. The single-age projected population provided by the Office of the Registrar General of India has been used in estimating child population. An attempt has also been made to compute flow rates in case of States and UTs having DISE data for more than two years. While analysing the flow rates, it is noticed that in some cases the data is inconsistent which is also true for apparent survival, retention and transition rate. Indicators in case of such States and UTs have not been reported.

#### 6. Random Checking of Data

With an aim to further improve the quality and reliability of data, it has been made mandatory for all the States & UTs to get the DISE data sample checked by an independent agency from the year 2006-07 onwards, for which NUEPA suggested the sampling methodology and developed a special data capture format for post enumeration survey. It is heartening to note that as many as 23 states initiated random sample checking of data in its very first year, most of which are conducted by the monitoring institutions (mostly ICSSR funded institutions and education departments in the universities) identified for the states. During 2007-08, as many as 21 states arranged Post Enumeration Survey of DISE data and 24 states, during 2008-09. It is hoped that remaining states would also undertake post enumeration of data in the year that follows. In addition, NUEPA has also launched PES of DISE data initially in three states, namely Andhra Pradesh, Himachal Pradesh and Maharashtra which is likely to be expanded to remaining states. All these efforts would not only help in further improving the quality of data but would also help in ensuring complete coverage.

### DISE 2008-09: Coverage

		School S	Structure	Number of Districts Reported Data								
Sl. No.	State & UT	Primary	Upper	2001	DISE							
			Primary	Census	2005-06	2006-07	2007-08	2008-09

## DISE Publications: A Few Comments

- Please accept my heartiest congratulations for the Silver Medal Awarded to the National University of Educational Planning and Administration for developing the School Report Cards under DISE. Shri Kapil Sibal, Minister of Human Resource Development, Government of India, New Delhi.
- My joy knows no bound in receiving 3 latest publications on Elementary Education in India published by the National University of Education Planning and Administration. NUEPA has been rendering yeoman's service to the cause of education in general and school education in particular for a long period of time. Shri Kanti Biswas, Former Education Minister, West Bengal.
- This is a most impressive publication and is very precious for students and researchers in this field. Mr. Jacques Hallak, UNESCO, Paris, France.
- I am amazed at the analysis of school infrastructure, enrolment, teacher statistics etc. The Education Development Index appears to be a welcome tool of comparing the performance of States. Shri. Prabhat Kumar, Former Cabinet Secretary, New Delhi.
- The publication is valuable and useful to our researchers. I shall display the publication in our library. Professor N.C. Shah, Director, Sardar Patel Institute of Economic and Social Research, Ahmedabad.
- These will be immensely helpful to our researchers. Mr. G.B. Devchoudhury, Librarian, Omeo Kumar Das Institute of Social Change and Development, Guwahati.
- This document is very useful for us and we are keeping it in our library as a reference source. Mr. S.K. Senapati, Library Officer, Central Building Research Institute, Roorkee.
- Your publication and information is latest and always covers new areas and indicators. Dr. Ajit Jain, Jaipur.
- *The publication is very useful to our library users*. Dr. Nanaji Shewale, Librarian, Dhananjayarao Gadgil Library, Gokhale Institute of Politics and Economics, Pune.
- We find the publication very useful and a valuable addition to our library collection. Dr. M. Koteswara Rao, University of Hyderabad, Indira Gandhi Memorial Library, Hyderabad.
- These publications have been added to the holdings of the library for consultation of research scholars. Mr. Jagdish Chander Verma, Library & Information Officer, Nehru Memmorial Museum & Library, Teen Murti House, New Delhi.
- *The publication will be very useful to us.* Mr. Vivek Bhandari, Director, Institute of Rural Management, Anand, Gujarat.
- I am sure that our library users including M.Ed and Ph.D students will be benefited from this publication. Dr. Muhammad Memon, Director, Aga Khan University Institute for Educational Development, Karachi, Pakistan.

- These reports are displayed in our library and are available to the students and staff for reference. Principal, Sacred Heart College, Cochin.
- I find the publication as a most useful statistical document. Professor Sabyasachi Bhattacharya, Chairman, Indian Council of Historical Research, New Delhi.
- The document will surely help us to understand the latest status of education in India in general and Gujarat in particular. Dr. Pushpa Wadhwani, Head, Azim Premji Foundation, Gujarat.
- The publication has been placed in the library of the Academic Staff College so that the participants of the refresher courses may have a glance at it. Dr. H.S. Bhatia, Director, UGC-Academic Staff College, Guru Nanak Dev University, Amritsar.
- We hope that the publication will be very useful for the users of our library. Librarian, Guru Jambheshwar University of Science and Technology, Hisar.
- The volume will be of much help to the teachers, researchers and administrators. Dr. P.K. Michael Therakan, Vice-Chancellor, Kannur University, Kerala.
- These documents would be of immense use to our readers as well as researchers. It will be a rich addition to our library collection. Dr. H.S. Chopra, Librarian, Bhai Gurdas Library, Guru Nanak Dev University, Amritsar.
- These documents are useful for M.Ed and research students. I have kept these publications in our college library for reference. Dr. L.B. Patted, Pricipal, K.U. College of Education, Dharwad.
- Your latest publications always inform us about "Where do we stand?" and Where do I have to go next in my research work. I very much appreciate your publication. Mr. Hisako, Japan.
- This publication is a valuable addition to our library. Dr. Renuka Narang, Education Consultant, Mumbai Transformation Support Unit, Mumbai.
- This publication is a superb and will be a valuable addition to our Library. Ms. Sushma Zutshi, India International Centre, New Delhi.
- The publication will surely achieve its purpose particularly for women's education and empowerment. Dr. Meenakshi Gopinath, Principal, Lady Shri Ram College for Women, New Delhi.
- The report will prove of a great help to all with an understanding of where do we stand and provides statically information for solving problems in education. Dr. Praveen Pandit, Principal, Government College of Education, Srinagar.
- The report is very useful and will be added to our library collection. Mr. Antony Jose, Management Development Institute, Gurgaon.

- The publication will be helpful to our users and is displayed in our Library. Dr. Vijaya Katti, Professor and Chairperson, Indian Institute of Foreign Trade, New Delhi.
- I just browsed through the reports and found them quite informative and useful. Professor R.S. Deshpande, Director, Institute for Social and Economic Change, Nagarabhavi, Bangalore.
- This publication is important for the North Eastern Region where the need for authentic and updated data-base is felt more than elsewhere in the country. Mr. P.P. Shrivastav, Member, NEC Secretariat, Shillong.
- This publication is very useful for users and it has enhanced our library collection qualitatively and quantitatively. Mr. Ganapathi, Entrepreneurship Development Institute of India, Gandhinagar.
- This report will be of great use to us in our day to day research work. Professor M.M. Gandotra, Executive Director, Centre for Operations Research and Training, Vadodara.
- *I find the publication well prepared, quite useful and informative,* Dr. B.N. Yugandhar, Member, Planning Commission of India, Yojana Bhawan, Parliament Street, New Delhi.
- The amount of data being disseminated regularly through DISE publications, enormous and rich in contents, attests to the significant achievement of NUEPA, Dr. Raman P. Singh, Deputy Advisor (Education), Planning Commission, Yojana Bhawan, New Delhi.
- Just received the two volumes of elementary education in India. Should I say I am privileged? I have just leafed through the pages and have had a sensation. What a tremendous job done! Mr. Soumen Hom, Kolkata.
- It is a valuable document. We will preserve it in our library as well as make it available to researchers. Dr. Ragini Prem, Secretary, Banwasi Seva Ashram, Sonbhadra, Uttar Pradesh.
- The publication is quite informative and we have displayed it in our library. Mr. Satish Sharma, Principal, DPS Korba, Chhattisgarh.
- The compilation is valuable for our institute's researchers as some of them are working on Status of Elementary Education in Punjab: A Comparative Study of Government, Recognized and Private Schools. Dr. Kuldeep Kaur, Director, Centre for Research in Rural and Industrial Development, Chandigarh.
- It is an excellent resource material for our work. Ms. Sharada Jain, Secretary, SANDHAN, Jaipur.
- *This has been invaluable document.* Dr. Indranee Dutta, Professor & Director, OKD Institute of Social Change and Development, Guwahati, Assam.
- Information contained in the publication is extremely useful. Dr. R. N. Pandey, Additional Director General, Ministry of Tourism, Government of India, New Delhi.

- It is an important and useful publication and is a boon for the administrator, academicians and researchers in the field of education. Dr. Saroja Prabhakaran, Vice-Chancellor, Avinashilingam University for Women, Coimbatore.
- The publications are very useful in knowing the progress and current status of education in India. Dr. M. Sreenivasa Rao, Azim Premji Foundation, Andhra Pradesh.
- We will add the publication to our well-used education section and are sure that our readers will find them useful and informative. Mr. Emma Mathieson, Librarian Oxford University, Oxford (U.K).
- We hope that in the future too we will benefit from such publications from NUEPA. Professor B.L. Shah, Director, Academic Staff College, Kumaun University, Nainital.
- Thank you for sending me very useful publications. Shri J. Veeraraghavan, Director, Bhartiya Vidya Bhavan, New Delhi.
- *I have placed the publication in our library for wider consultation by our scholars.* Professor C.H. Hanumantha Rao, Chairman, Centre for Economic and Social Studies, Hyderabad.
- NUEPA's success in operationalising the nationally acclaimed DISE has been one such landmark, revolutionizing the role of education planners, who can now address local developmental needs from an informed perspective, armed with statistical and situational data. Mr. Samphe Lhalungpa, Ex-Chief, Education Section, UNICEF India Country Office, New Delhi.
- It is very useful to me in my daily work. Mr. Krishne Gowda, Co-ordinator, Block Resource Centre, Karnataka.
- The publications are quite smart, useful and informative at school level and individuals for academic and administrative purposes. Dr. Gajanan Patil, Principal, DIET, Ratnagiri, Maharashtra.
- A quick glance at the report indicates that it will be of immense help to the academicians in general and researchers in particular. Professor S.C. Panigrahi, Head, CASE, M.S. University of Baroda, Vadodara.
- A great piece of work, congratulation for putting everything in black and white, Dr. Maheswar Lal, Asha for Education, Philadelphia.
- The publications: Elementary Education in Rural and Urban India would be very useful addition to our library, Mr. Mohammad Hamid Ansari, Chairperson, National Commission for Minorities, Government of India, New Delhi.
- The publications containing valuable recent data on the state of elementary education in India will no doubt be found most useful by me and my students at JNU. Professor D.N. Rao, Centre for Economic Studies & Planning, Jawaharlal Nehru University, New Delhi.
- The DISE Flash Statistics is becoming smarter with more and more information. I congratulate DISE team for their total dedication in compiling the data. Mr. S.S. Rajagopalan, Chennai.

- This valuable and informative publication will be of immense importance to researchers and policy makers in the filed of education. Professor R. N. K. Bamezau, Vice-Chancellor, Shri Mata Vaishno Devi University, Jammu & Kashmir.
- The publication has been added to the holdings of the library for research scholars. Mr. Radhey Shyam, Information Officer, Nehru Memorial Musuem & Library, Teen Murti House, New Delhi.
- I have forwarded the documents to the Department of Education of our university for placing the same in the library and sharing the information with all concerned. Professor Satya P. Gautam, Vice-Chancellor, Mahatma Jyotiba Phule Rohilkhand University, Bareilly.
- This will be very informative and helpful to the students and the researchers of the university. Professor Pradip Narayan Ghosh, Vice-Chancellor, Jadavpur University, Kolkata.
- Our research faculty and readers have appreciated this valuable donation. These documents are very useful to our researchers for their research work. Ms. Jayashree Kulkarni, Librarian, CDMR, Dharwad.
- I fully agree with you that this offers a wealth of information to research workers and policy makers interested in elementary education. Dr. S. Krishnamoorthy, Registrar, Amrita Vishwa Vidyapeetham, Ettimadai, Coimbatore.
- The publication is informative and would be widely used by the researchers who are engaged in the relevant field. Dr. P. Kumar, Director, National Tuberculosis Institute, Government of India, Bangalore.
- This document had been immensely useful as it provides useful and vital information to B.Ed Trainees besides enriching our library. Ms. Anita Singh, Director, Saraswati College, Ghaziabad, Uttar Pradesh.
- The excellent work NUEPA is doing year after year; the publication will be immensely useful both for researchers and educational activists. Mr. Vinay Kantha, East & West Educational Society, Patna.
- It would be wonderful to get school-specific raw data for various research purposes. Dr. Savita Sinha, Professor & Head, DESSH, NCERT, New Delhi.
- The publications are very informative. Dr. Shayama Chona, Principal, Delhi Public School, New Delhi.
- I am sure the publication will be of immense use to many in the field of school education. Mr. S. Sathyam, Chairman, HRD Ministry's Review Committee on Educational Statistics, New Delhi.
- We have proudly displayed these documents in our library. Mr. A. R. Kidwai, Academic Staff College, Aligarh Muslim University, Aligarh.

- I am sure that the staff and researchers would find it immensely useful for their teaching and research, and it is a useful addition to our college library. Mr. K. T. Dilli, Loyola College, Chennai.
- These publications are of immense use, not only to academicians pursuing research in school education, but also to common readers who are concerned about the future of their children. Professor C.P.S. Chauahan, Dean, Faculty of Social Science, Aligarh Muslim University, Aligarh.
- The publication is extremely useful for me as well it has immense value for all academicians, researchers, students and officials associated with the elementary education. Dr. Rafiqul Islam, Associate Professor, Visva Bharti, Shantiniketan.
- The publication will be a source of vital information to all concerned at our institute. Ms. Aparajita Ojha, Director, PDPM-Indian Institute of Information Technology, Jabalpur.
- The publication will be included as valuable addition to our library collection. Mr. Yogendra Singh, Mahatma Gandhi Central Library, IIT-Roorkee.
- Research scholars in education, especially elementary education, would be benefited a lot by these volumes. Dr. Cherla Raja Mouli, Secretary General, Indian Education Congress, Manikonda, Andhra Pradesh.
- This publication has not only become an annual feature but it has also acquired a distinct character of its own as a comprehensive source of reference on elementary education in India. Ms. Sushma Berlia, President, Apeejay Stya Group, Apeejay Satya House, New Delhi.
- These documents shall be very useful for the students of my university. I appreciate NUEPA's gesture and hope that in future we shall remain in touch for all practical purposes. Professor S. K. Singh, Vice-Chancellor, Bhoj Open University, Bhopal, Madhya Pradesh.
- We became very pleased and hope in future you must support us through these type of educational material from which our organization enrich its performance and updates knowledge in educational concern. Mr. Umesh, Secretary, Samajik Parivartan Sansthan, Giridih.
- The document is of immense help to me and for the teachers in our organization. Professor Abani Boral, Vice-President, World Federation of Teacher's Union, National Co-ordination Committee of Indian Teachers' Organisation, Bhubaneshwar, Orissa.
- The publications are immensely helpful with their rich State and District specific information on all vital aspects of elementary education. Dr. C. Seshadri, Chairman, Karnataka Knowledge Commission, Karnataka.
- I have been receiving these publications regularly and the students & teachers of my department are immensely benefited out of these publication. Dr. Nityanada Pradhan, Head, Department of Education, DAV College, Koraput, Orissa.

- We find these documents very useful for our analysis on trends in education. Mr. Chetan Ahya, Managing Director, Morgan Stanley Research, Singapore.
- We will make best use of these publications for the betterment of education in the State. Principal, SCERT, Solan, Himachal Pradesh.
- This will become an important educational statistical tool for our library. Mr. S.G. Meshram, Librarian, SNDT Women's University Library, Mumbai.
- I am sure that the document is extremely useful for me in my academic work. Ms. Neerja Shukla, Professor & Head, NCERT, New Delhi.
- Thanks for felicitations for your monumental publication, Elementary Education in India: Progress towards UEE, Analytical Report. Mr. Saiyid Hamid, former Vice-Chancellor, Aligarh Muslim University, Chancellor, Jamia Hamdard and Secretary, Hamdard Education Society, New Delhi.
- The data provided by DISE would be of immense help to the people who are working in the field of primary education. It would have been of great help to government to properly plan for the school level education for Muslims. Mr. Kamal Faruqui, Chariman, Delhi Minorities Commission, Vikas Bhawan, New Delhi.
- It was great to learn about the progress made regarding DISE. Dr. Deepa Sankar, Education Economist, The World Bank, New Delhi.
- We hope to benefit from the publication. Dr. Montek Singh Ahluwalia, Deputy Chairman, Planning Commission, New Delhi.
- Congratulations on the excellent production of the two volumes of the District Report Cards. Professor Amitabh Kundu, Centre for Studies in Regional Development, Jawaharlal Nehru University, New Delhi.
- I wish to compliment NUEPA for the valuable documents, very well structured to serve as valuable reference material. Dr. M. Anandakrishnan, Chairman, Indian Institute of Technology, Kanpur.
- Both these publications will be of immense help for the department. Dr. R.G. Kothari, Professor of Education, The Maharaja Sayajirao University of Baroda, Vadodara.
- These documents are useful for the users of our library. Professor, Maharshi Dayanand University Library, Rohtak.
- The publications are very informative and would be used widely by researchers and policy makers engaged in the field of elementary education in India. Professor R. Sambasiva Rao, Director General, Ministry of Health and Family Welfare, New Delhi.
- On behalf of our students and faculty, I would like to congratulate NUEPA for producing such valuable publications. Indeed, our faculty, researchers and students will benefit from the scholarly work that provides deeper insight into elementary education in India. Dr. Muhammad Menon, The Aga Khan University, Karachi, Pakistan.

- It is a massive work magnificently executed. Mr. Marmar Mukhopadhyay, Director, Educational Technology and Management Academy, New Delhi.
- I am sending these publications to our Library for the benefit of researchers and students of JNU. Professor B.B. Bhattacharya, Vice-Chancellor, Jawaharlal Nehru University, New Delhi.
- The hard work done by NUEPA in bringing out these volumes without much time-lag is commendable. The quality of publication is excellent. I am sure that the material given in these volumes will be widely used. Professor A.B.L Srivastava, Chief Consultant, Technical Support Group, Ed. CIL. New Delhi.
- This report will great reference material for our work and will be referred by researchers and students who come to visit our centre. Professor Virgil D'Sami, Executive Director, Arunodhaya Centre for Street and Working Children, Chennai.
- It is a very useful document for our faculty. Our library will be richer by this addition. Dr. S.R. Hashim, Director, Institute for Studies in Industrial Development, New Delhi.
- This will herald a new era for the academicians and researchers in the field of education to embark on fresh research and analysis. Professor Rajendra Menaria, Jaipur.
- We feel pleasure to say that the documents contain useful information about the elementary education in India. Mr. Swami Swarupanand, Secretary, Ramakrishna Ashram, Gwalior.
- I assure, these publications will be brought to the notice of our collegeus in the SCERT. Mr. S. Suresh Babu, E-mail: sugoorusuresh@gmail.com.
- I would like to congratulate NUEPA on producing a valuable report, which provides an analytical landscape of elementary education in India. Dr. Hamid-ud-din Al Kirmani, Professor and Director, The Aga Khan University, Karachi, Pakistan.
- The publications are bound to help in my working on legal aspects of right to elementary education. Mr. Ashok Aggarwal, Social Jurist, New Delhi.
- Both reports are very useful for us because we are now in the process improving our data collection. Mr. Sam Sereyrath, Director of Planning, MoEYS, Cambodia.
- Thanks for sending me this invaluable volume. Professor Anil Sadgopal, Sahkar Nagar, Bhopal.
- Congratulations on all your good work with DISE data. It is really a fantastic achievement to get increasingly reliable data on 1.3 million elementary schools in India. I think a lot can be done in terms of district level analysis of the data. Dr. Geeta Kingdon, Department of Economics, University of Oxford, Oxford.
- Thanks for sending me two volumes of your valuable publication, Elementary Education in India: District Report Cards. Professor Ashish Bose, Leading Demographer and Former Professor, Institute of Economic Growth, Delhi.

- Rest assured that our education team in India will make full use of this publication, and will encourage others to do so well. Mr. Sam Carlson, Lead Education Specialist for India.
- The report is a rich source of data and useful for our research students. Professor Geetha B. Nambissan, Chariman, Zakir Hussain Centre for Educational Studies, Jawaharlal Nehru University, New Delhi.
- I am sure the document will be of great help to all those who are committed to universal elementary education. Mr. Prakash Karat, General Secretary, Communist Party of India (Marxist), New Delhi.
- Congratulations for launching over one million school report cards this is wonderful achievement, Dr. Michael Ward, Senior Education Adviser, DFID India, British High Commission, New Delhi.
- It has been a sole pivotal contribution of NUEPA to the world of education, which shall be always remembered. Professor B.P. Khandelwal, NOIDA, Uttar Pradesh.
- Hon'ble Human Resource Development Minister Shri Kapil Sibal has been quite pleased to note the enormous efforts of NUEPA that went into the significant publication, and extends compliments to all those behind the arduous compilation which would be of immense value to the policy-makers and researchers. Mr. Satish Nambudiripad, PS to HRM, Government of India, New Delhi.

## One Million+ School Report Cards (www.schoolreportcards.in)

Winner of Manthan Award South Asia 2010

e-Governance and eINDIA 2010 National Awards

Planning and Administration has created a comprehensive database on elementary education in India under one of its most prestigious projects, known as, District Information System for Education (DISE). The project covers both primary and upper primary schools/sections of all the districts of the country. What is more remarkable about DISE is that it has drastically reduced the time-lag in availability of educational statistics which is now down from 7-8 years to less than a year at the national and only a few months at the district and state levels. DISE is supported by the Ministry of Human Resource Development and UNICEF.

The National University has successfully developed School Report Cards of more than 1.29 million primary and upper primary schools/sections. In addition to quantitative information, the Report Cards also provide qualitative information and a descriptive report about individual schools. And, all that can now be accessed with the click of a mouse. Even school-specific raw data has also been provided online to users.

The Report Cards are produced to provide users comprehensive information on all the vital parameters, be it student, teacher or school related variables, yet concise, accurate information about each school in a standard format which is easy to understand and allows meaningful comparisons to be made among schools. We hope that these reports are used in constructive conversations which lead to improved education for all children across the country.
